

TAG. YOU'RE IT

YOU DON'T SEE GRAFFITI VERY OFTEN on the Central Coast. That's the idea. Clean it up quick. The sooner graffiti is removed, the easier it is to clean. If you see graffiti in your neighborhood try these removal tips.

- For pens on painted wood or metal surfaces, use denatured alcohol or commercial cleaners.
- For spray paint on painted wood, concrete or metal surfaces, use denatured alcohol or repaint.
- For pens or spray paint on unpainted concrete, stucco or aggregate, use commercial cleaners, then water under pressure with a wire brush.
- For pens or spray paint on glass or plastic, use a window scraper, then denatured alcohol.

With a little elbow grease, you can take back your neighborhood.
